

NDSCS program receives national reaccreditation

The North Dakota State College of Science auto body repair and refinishing technology program recently received reaccreditation by the National Automotive Technicians Education Foundation. To achieve this recognition, the college's program underwent rigorous evaluation by the foundation. Nationally accepted standards of excellence in areas such as instruction, facilities and equipment were used.

“This is great news for automotive-minded young people and their parents,” said Donald Seyfer, former NATEF Chair. “Because this program increases cooperation between local education and industry leaders, it gives added assurance that NDSCS graduates will be employable entry-level technicians. As a result of the quality education provided by NDSCS, the motoring public will benefit since better repair technicians will join the work force.”

Upon completion of the evaluation, the college became reaccredited by NATEF. To learn more about the NDSCS Automotive Repair & Refinishing Technology program, including certificate and A.A.S. degree options, visit www.ndscs.edu/autobody or call 1-800-342-4325 ext. 2521.
